

Steward of the Springs — Admin Guide

For Site Administrators and Org Staff

2026

Getting Started

Accessing the Site

The public website is at **<https://sos.skymoco.dev>**

Visitors can use the public pages (Home, Stewardship, About) without logging in.

Accessing the Admin Panel

1. Go to **<https://sos.skymoco.dev/admin/login>**
2. Enter your admin username and password
3. You will be taken to the Admin Dashboard

Keep your login credentials private. Contact your technical administrator to reset a forgotten password.

The Admin Dashboard

The Dashboard is the first screen you see after logging in. It shows a live count of:

- **Springs** — locations being monitored
- **Participants** — registered stewards and volunteers
- **Visit Logs** — stewardship check-ins submitted
- **Milestones** — achievements earned by participants

Use the sidebar on the left to navigate between sections.

Managing Springs

What is a Spring record?

Each spring in the system represents a physical hot spring location. Springs are connected to visit logs and participant assignments.

Adding a New Spring

1. Click **Springs** in the sidebar
2. Click + **Add Spring**

3. Fill in the details:
 - **Spring Name** (*required*) — the common name for this location
 - **Region** — general area (e.g., “Central Utah”, “Eastern Sierra”)
 - **Status** — Active, Inactive, or Monitoring
 - **Latitude / Longitude** — GPS coordinates (decimal format, e.g., 38.5733, -109.5498)
 - **Description** — any notes about the spring
4. Click **Add Spring**

Editing a Spring

1. Find the spring in the list
2. Click **Edit** on that row
3. Update the fields and click **Save Changes**

Removing a Spring

Click **Delete** on a spring row. You will be asked to confirm. This cannot be undone.

Managing Participants

What is a Participant?

Participants are the people who visit and steward springs — volunteers, stewards, and monitors. Each person has one record linked to their email address.

Adding a New Participant

1. Click **Participants** in the sidebar
2. Click + **Add Participant**
3. Fill in:
 - **First Name** and **Last Name** (*required*)
 - **Email** (*required*) — must be unique
 - **Phone** (*optional*)
 - **Status** — Active or Inactive
4. Click **Add Participant**

Editing a Participant

Click **Edit** next to their name, update the fields, and click **Save Changes**.

Deactivating a Participant

Rather than deleting, set their status to **Inactive**. This keeps their history intact.

Visit Logs

What is a Visit Log?

Every time a steward submits a Stewardship Check-In on the public site, it creates a Visit Log. Logs record:

- Which spring was visited
- Who visited

- The visit date
- Conditions observed
- Notes and actions taken

Viewing Logs

Click **Visit Logs** in the sidebar to see all check-ins in reverse order.

Logs submitted through the public Stewardship Check-In page appear here automatically.

The Public Website

The public-facing website has three pages visitors can access:

Page	URL	Purpose
Home	/	Overview, mission, and process
Stewardship	/stewardship	Activity guide and Check-In form
About	/about	Org story and values

The Stewardship Check-In Form

Visitors fill out the form at `/stewardship` to log their visit. When submitted, the entry appears in the Admin Panel under **Visit Logs**.

Common Tasks

Someone wants to become a steward

Add them as a Participant with status **Active**. They can then submit check-ins on the public site.

A spring is temporarily closed

Edit the spring and set its status to **Monitoring** or **Inactive**.

I need to see all visits to a specific spring

Go to **Visit Logs** — filtering by spring will be added in a future update.

Getting Help

For technical issues, contact your developer. Please include:

- What you were trying to do
- What happened instead
- A screenshot if possible
